RE: BTA Oil Producers \* Ogden 1 (Ogden Gas Line) \* **2RP-3996** \* DOR: 7/15/16

Todd,

Your proposal for remediation of the above referenced release is **not** approved at this time. Based on the 7/21/16 sampling event, sample points 5, 12, and 21 exhibit hydrocarbon levels above RRAL for this site ranking (20). The proposal does not adequately address the disposition of these areas. Also, there are some inconsistencies in the background samples for chloride levels. OCD requests samples be obtained at the approximate site indicated on the attached map. It is approximately 65 yards south the release area, in the approximate center of the adjacent farm field. Samples are to be obtained at surface, 1' bgs, 2' bgs, and 3' bgs, at a minimum. Once this data is available, and disposition of the hydrocarbon impacted areas provided, OCD will review the proposal based on this additional information.

If you have any questions or concerns, please contact me.
