**Subject:** Re: XTO - Nash Unit #042 H Work Plan

To cont. do we need to get a 1' sample with lab data to you. And even though it's a battery would be required to dig below requested depth or install a liner or both.

BLM DENIES your work plan due to insufficient lab data. BLM will require lab confirmation at 1' of what you are proposing to leave behind to ensure the remaining impact is below regulatory limits.

If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

*Shelly J Tucker*

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Good morning.

Attached is the Work Plan for the XTO Nash Unit #042H site.

Please let me know if you have any questions or comments.

Thank you,

Laura Flores
