**Subject:** WPX RDU 11 - spill notification

Good morning,

Yesterday, 11/5/16, WPX had a spill at the RDU 11 well pad, API # 30-015-24307; T26S R30E S22. The

cause of this spill is equipment failure. A pump air locked causing tank to overfill. 66 bbls of oil was recovered from a dirt SPCC containment berm; none of the fluids have left the containment. The C-141 report will be submitted within 15 days from the incident.

Please let me know if you have any questions or concerns.

Thank you and have a great Sunday.

*Karolina Blaney*
