The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Please find attached the C-141 Initial for the below listed location. Also attached is the NMOSE Well Log Information sheet. The well log information refutes the Chevron-Texaco Map trends for Section 34, T20S-R25E. The well log information displays water depth to be deeper to the south than portrayed by the Chevron-Texaco Map, making this release a site ranking ZERO.

Kiawah BFQ Federal #1

30-015-34059

1830 FSL & 660 FWL

Section 34, T20S-R25E

Eddy County, New Mexico
