RE: 2RP-3952

OCD accepts the Final C-141 for the referenced release. It is OCD's understanding that all impacted material in the containment has been removed and the liner inspected for integrity. Please reference the OCD assigned RP number for all future communications having to do with release incidents.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.
