---

Mr. Bratcher,

On February 8, 2017, DCP Midstream was notified by NMOCD of a potential petroleum hydrocarbon release at the SC-1-13-1 pipeline located approximately 4.5 miles east of Whites City, New Mexico (Site). The GPS coordinates for the Site are 32.181439 N, -104.300181 W. On behalf of DCP Midstream, Tasman Geosciences will perform investigation activities at the Site to delineate the lateral and vertical extents of petroleum hydrocarbon impacts. Soil samples will be submitted for laboratory analysis of BTEX and TPH-GRO/DRO. Once the Site investigation activities are complete and based on the laboratory analytical results from the investigation, Tasman will submit a Proposed Remediation Work Plan for approval if the analytical results indicate that environmental impacts are above NMOCD Action Levels. Should you have any questions or require additional information, please let me know.

Thank you,

Kyle Norman  
Tasman Geosciences
