Re: RDX 17-20 workplan for the characterization of impacts – Case # 4132

Dear Ms. Weaver,

The purpose of this letter is to propose a workplan for the characterization of impacts associated with the RDX 17-20 produced water spill which occurred on February 10, 2016.

WPX received BLM's approval to excavate the top 2' of the impacted area off location to prevent chlorides from further migration. The excavation activities were completed the week of 2/13/17 and the excavated material was hauled off for disposal. Several samples will be collected from the affected area to verify vertical extent of the impacts. Samples will be analyzed for TPH, BTEX and Chlorides. Once the characterization is completed, WPX will submit the results to OCD along with a cleanup plan for prior approval.

Please do not hesitate to call me if you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Karolina Blaney".
