Hey Lucas,

Check your work cell voicemail. I left you a conditional verbal approval for this site work plan. The condition being that we need bottom hole confirmation samples and clarification on whether you are going to be excavating to 6ft. for the whole release area or will it just be in certain areas? Your report was not clear on that. Also you report was not clear on what background level of chlorides you all were wanting to go with? I am guessing it is the 3000ppm read from D2—6?

Thank you and have a good weekend. If you have any questions Heather will be here till 2:30pm or I will be back Monday morning.

Cheers,

Crystal Weaver
