**** External email. Use caution. ****

Hello Becky,

On the C-141 it states "release remained in the bermed area," however when I look on Google Earth I show (as of most current imagery date 2/1/17) that the bermed area around the tank battery is also lined. So I called COG cause I noticed the volume recovered was pretty high and we talked about the status of the liner. It sounds like as far as COG could tell it didn't sustain much direct impact from the lightning and seems to have held up for the most part thru the fire. OCD will in this case require that the liner be fully checked for any breaches and delineation be conducted at any sites where a breach had occurred. Photos also will be helpful on this one. Glad to hear that the liner appears to have held for the most part. Following this email a signed C-141 with COAs attached will be sent soon by OCD. In the mean time please proceed with any immediate response action and drafting a delineation plan.

Thank you kindly,

Crystal Weaver

Subject: (Notification) LOCO HILLS SWD 33 #004 8/21/2017 (30-015-37269)

Ms. Weaver/Ms. Tucker,

COG Operating LLC is reporting a release at the LOCO HILLS SWD 33 #004 (30-015-37269)

Unit P Section 33 Township 17S Range 30E

OGRID# [229137]

The release occurred on 8/21/2017 at approximately 2:00:00 AM

Estimated Released: Approx: >25 bbls

Estimated Recovered: Approx: Unknown at this time. (Fluid recovery is ongoing)

The release occurred when lightning struck the facility. The facility and equipment were a total loss. The flow lines coming into the facility were isolated and the release remained within the bermed area. Vacuum trucks are on site recovering fluid and an updated released and recovered amount will be provided with the C-141. If you have any additional questions please don't hesitate to contact me.

Thank you,

Dakota Neel
