Dennis,

I got your voicemail. I am not sure what there is to discuss regarding the distance between the two releases or the time from which they both come from. It appears according to your labeling on the GE image you attached that they are relatively close to one another. If 2RP-2462 has not already been previously remediated then it would be ideal if both of these releases could be taken care of all at once. Please advise OCD on the status of the older release (2RP-2462) and what Linn Energy's intentions are to resolve that release and the current release (2RP-4375).

Thank you,

Crystal Weaver

Crystal,

I have attached a google earth shot of the 2 injection leaks in question. I dropped a pin on both sites and dated them. I will call you so we can talk about this.

Thanks
Dennis

RE: Linn Energy * H.E. West B #30 * 30-015-10705 * 2RP-4375

Dennis,

Sorry for the delay on sending this one out. I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval. The OCD tracking number for this event is 2RP-4375. Please remit a site characterization plan or advise OCD of plan of action by no later than 10/5/17.

Please note: I was looking in the records for this location and I found an old case numbered 2RP-2462 that according to our records nothing else has been sent in since the initial C-141. Please provide an update for this release.

Thank you,

Crystal Weaver
