If a Watercourse was Impacted, Describe Fully.*		
Describe Cause of Problem and Remedial Action Taken.* Fresh water released into caliche pit		
Describe Area Affected and Cleanup Action Taken.* RDL hired SMA to assess the site and the quality of the water released into the caliche pit. Laboratory samples brought back no significant impact in the caliche pit. Samples were taken from the release point and the pooling area, as directed by A. Groves with NMSLO.		

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
