RE: CHI * Benson Delaware Unit #6 * 30-015-33881 * 2RP-4251

Clif,

I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval. The OCD tracking number for this event is 2RP-4251. As the COAs state we will be expecting a site characterization/remediation proposal from CHI Operating by 7/5/17.

PLEASE NOTE: I have also attached an old initial C-141 from a release that occurred at this same site location back in 2012 around February. This is the last and only document that we have received here at the OCD regarding this release. The release was given a tracking number of 2RP-1051. Could we please get some further information on what has happened with this release?

Thank you,

Crystal Weaver
