---

Ms. Weaver,

Thank you for taking my call this morning. As I stated we are aware of the issues involving this location as have had discussions which will continue. I talked with BBC this morning and they will delineate the May 27, 2017 spill next week.

Thank You,

Becky Haskell

RE: COG \* West Brushy 8 Federal SWD #1 \* 30-015-31675 \* 2RP-4240

Becky,

I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval. The OCD tracking number for this event is 2RP-4240.

**PLEASE NOTE:** I was also looking in the files for this site location to see if there were any other remediations that we needed an update on and I came across case number [2RP-3353](#). Could we please get an update on that one. I have attached OCD's last response to COG and I also attached [\[redacted\]](#)

BLM's request on 6/13/16 for an update. Also [2RP-3774](#) which BBC International Inc. was contracted to work has not had an update to us since 3/1/17. BBC International states in the email that attached above that the remediation effort for 2RP-3774 will also incorporate a clean-up of the extent of 2RP-3353. So maybe following up with 2RP-3774 will cover follow up of both of these that I have requested. Also may we please get an update on [2RP-4094](#). I also attached a copy of the last correspondence from OCD which was a work plan approval to BBC International on 4/6/17.

**Further Note:** There have been 7 spills that have occurred at this site location starting since 2014. Therefore, OCD at this time would like to pose the question to COG regarding whether or not a root cause analysis has been conducted for this site location and if any considerations have been made regarding potentially replacing the poly-flow line (if it is the same one that has had reoccurring issues) or if anything further can be done to also prevent the reoccurring pw tank overflow issue.

Thank you,

## Crystal Weaver
