Rebecca,

So sorry. I have been reading all day and I think my eyes mistook that paragraph in her email for one of those "if you are not the authorized recipient of this message blahh blahh..."

Again really sorry. Thanks for sending this originally and again. I see that your request is valid for us to consider it urgent and I will do my best to move it up to be looked at ASAP.

Thanks and again I apologize,

Crystal Weaver

Subject: RE: URGENT: COG GJ West Coop Unit #210 Work Plan Approval Request (2RP-4487)

Crystal,

There is a blub on why it is urgent below but here it is again:

COG is currently in the process of removing equipment from this battery to allow for remediation. The battery will be moved to another location on the same well pad, however part of the new battery will overlap the existing battery placement. The area of overlap will be on the southwest end of the current battery placement. Remediation activities on that end need to be completed as soon as possible to allow for construction of the new battery and for production to be turned back on.

I know you are very busy which is why the blub was included in the original email. We did discuss this site with Mike, however, plans have changed since then. We discussed the possibilities of maybe getting a deferment for this spill. COG has decided to move the battery so that a full remediation can be completed on this particular release. However, things are already in motion and we need to be able to conduct the remediation as soon as the equipment is done being removed. We would really appreciate your assistance with this.

Thank You,

Becky Haskell

**** External email. Use caution. ****

Clair,

When you send something as urgent can you please write a blurb on why it is considered to be urgent by COG/Tetra Tech. Cause OCD is very behind right now and we have to gage what is urgent and not by our method of assessment in order to allow for the possible placement of it ahead of others. Mike is out of the office right now and I know there was a discussion with him on a number of sites and I think this one is one of them but I was not present for that conversation.

Thank you in advance,

Crystal Weaver

Importance: High

Good Afternoon,

Attached is the work plan for the above referenced site located in Eddy County, New Mexico. Once approved, COG will implement the proposed work plan.

COG is currently in the process of removing equipment from this battery to allow for remediation. The battery will be moved to another location on the same well pad, however part of the new battery will overlap the existing battery placement. The area of overlap will be on the southwest end of the current battery placement. Remediation activities on that end need to be completed as soon as possible to allow for construction of the new battery and for production to be turned back on.

Let me know if you have any questions or concerns.

Thank you,

Clair Gonzales
