Subject: Darner 9 State #1 (API 30-015-37633)

Mike/Crystal,

We had a release today at the above-mentioned location. The steel stock tank developed a leak due to corrosion and it released 16 bbls into a lined (intact) containment. The containment is gravel/soil filled and most of the oil was soaked up. The impacted soil will be removed and disposed of at disposal.

Please find attached a C-141 for this event.

Thank you!

Christine Alderman
