The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. Signature: OIL CONSERVATION DIVISION Approved by Environmental Specialist: OIL CONSERVATION DIVISION	Leak affected 34,600 ft² of pasture to the east of the flare due to high winds. Impacted area was washed down with Micro-Blaze ® on 5/27/2016. Soil samples were retrieved on January 20, 2017 as well as on July 18, 2017. Samples were analyzed at an NMOCD approved laboratory and concentrations of constituents of interest (BTEX, TPH, chloride) were found to be below the recommended remediation action levels. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment.
