NATURE OF RELEASE												
Type of Release Produced Water/Crude Oil						Volume of Release 38 bbls			Volume Recovered 35 bbls			
Source of Release Flow Line							Date and Hour of Occurrence Date and 2/2/2018 time unknown 2/2/2018			Hour of Discovery		
Was Immediate Notice Given? ☐ Yes ☐ No ☒ Not Required						If YES, To Whom?						
By Whom?						Date and Hour						
Was a Watercourse Reached? ☐ Yes ☒ No						If YES, Volume Impacting the Watercourse. N/A						
If a Watercourse was Impacted, Describe Fully.*												
Describe Cause of Problem and Remedial Action Taken.* Buried steel flow line in road crossing developed a hole due to corrosion. Line was clamped and well was shut-in until repairs were completed.												
Describe Area Affected and Cleanup Action Taken.* The release affected 500 square feet of lease road caliche and approximately 55 square feet of pasture extending northwest of the road crossing. Standing fluids were recovered.												
Remediation included excavation of approximately 115 cubic yards of impacted soil that was transported and disposed at Lea Land Disposal Facility. Five confirmation soil samples were collected from the excavation. Laboratory analytical results from the confirmation soil samples indicate concentrations of BTEX, TPH, and chloride do not exceed NMOCD remediation standards and all impacted soil was removed. XTO will backfill the excavation and reconstruct the access road with caliche road base. The area affected off pad will be reclaimed by contouring to natural topography and reseeding with the appropriate seed mix.												
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
