Crystal,

First I apologize for the delay in responding to your email from earlier this week. I have provided the sampling data and site diagram for this release. The affected area has been excavated, using these sample results to guide the work. Following the excavation additional samples have been collected, and we are currently waiting for the analyses to come back. We're hopeful that we will not have to conduct any further excavation, and will be able to submit a backfill/closure request in the coming week.

If you have any questions regarding the work already completed, or our plans moving forward, please let me know.

Thanks,
Kerry Egan

RE: Lucid * Emma 8" Steel Line * fAB1806440448 * 2RP-4646

Kerry,

I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval (COA). The OCD tracking number for this event is 2RP-4646, please refer to this tracking number on any and all submissions sent in to the OCD. Please remit a site characterization plan (see COA document included in attachment) or advise OCD of plan of action immediately since this one has a due date of 4/1/18 and that has passed.

Thank you,

Crystal Weaver

Subject: Emma 8" Leak

Mike and Crystal,

Please find the attached initial C141 form for the *Emma 8"* leak. Lucid is working to prepare a work plan for the remediation of the site, and will submit it when complete.

In the meantime if there are any questions regarding this matter, feel free to contact myself or Ruben Molina.

Thanks,
Kerry Egan
