Subject: RE: Plains Marketing L.P., Hackberry Hills Fed #4 2RP-4247 Closure Report

RE: Plains All American * Hackberry Hills Fed 4 * 2RP-4247 * DOR: 5/10/17

OCD concurs with BLM approval for closure of the above referenced release.

Mike Bratcher
NMOCD District 2
811 South First Street
Artesia, NM 88210
575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

Mr. Bratcher and Ms. Tucker,

Please find the attached the "Remediation and Closure Request" and Final C-141 for the Plains Marketing, L.P., Hackberry Hills Fed #4 Release Site, NMOCD Ref.#2RP-4247. The release occurred on May 10, 2017, at the Read and Stevens Hackberry Hills Fed #4 Tank Battery located in Unit Letter "F" of Section 22, Township 22 South, Range 26 East of Eddy County, New Mexico. A Plains transport driver was attempting to remove a bull plug from the tank valve when he inadvertently removed one part of a two part valve releasing approximately one hundred sixteen (116) barrels of crude oil of which approximately two (2) barrels were recovered. The released fluids impacted an area of approximately 8,900 square feet on the caliche pad, the released fluid flowed south off the pad impacting approximately 750 square feet of pasture land. The Release was reported to the New Mexico Oil Conservation Division (NMOCD) and Department of the Interior Bureau of Land Management (BLM). The impacted soil was excavated and confirmation soil samples were collected and analyzed for concentrations of TPH, BTEX and Chloride. The impacted soil was transported to an NMOCD permitted Facility and the excavated area was backfilled with locally purchased, non-impacted material. If you have any questions or require any additional information, please contact me at the numbers listed below.

Respectfully submitted,

Camille J. Bryant

Remediation Supervisor
