Crystal,

Yes we are in the middle of the remediation activities at this location. We are working in the old battery and on location.

I will be on site tomorrow around 12:00 pm.

Hey Kimberly,

Are you all still doing any more remediation activities out at this site? If so I would like to come out and check this one out if you don't mind.

Thank you kindly,

Crystal Weaver

Subject: RE: Cotton Draw Unit #181 Battery

RE: Devon Energy * Cotton Draw Ut 181 * 2RP-3990 * DOR: 11/3/16

Kimberly,

Your proposal for remediation of the above referenced release is approved. OCD agrees to additional delineation at time of excavation operations in the area of S-5, and requests the same for the area of S-6. In the area of S-2, OCD requests the excavation extend through the 3' interval to the top of the 4' interval, or, depth guided by field data during excavation operations. Please advise once remedial operations have been scheduled.

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

If you have any questions or concerns, and for notification, please contact me.

Thank you,

Mike Bratcher

Mile,

Please find attached the revised work plan for the above location. We would like to start remediation activities next week.

If you have any questions or concerns please contact me.

Thank you.
