Hi Amy,

You may pull samples yourself. My bet would be you have not forgotten how to.

Thanks,

Mike Bratcher

Hello! Just another C-141 for a medium stuffing box leak on a well head (packing failed). The packing has been repaired and most of the fluids recovered. I'll most likely get MEC to help me remove this as long as it's ok with you if I do the sampling myself? We're trying to bring as many activities in-house as possible and taking my own samples would be a good way to do this. I appreciate any feedback you care to give me on this idea with questions/concerns. Hope you're all having a good week so far. I'm loving the cooler weather! Thanks a bunch and hope to see you soon...
