NATURE OF RELEASE			
Type of Release Crude Oil and Produced Water	Volume of Release: 8 bbl oil	Volume Recovered: 0 bbls	
	2 bbl PW		
Source of Release: wellhead tubing	Date and Hour of Occurrence 11/5/2015 at 2pm	Date and Hour of Discovery 11/5/2015 at 2pm	
Was Immediate Notice Given?			
$\Box \text{ Yes } \Box \text{ No } \boxtimes \text{ Not Required } N/A$			
By Whom? N/A	Date and Hour: N/A		
Was a Watercourse Reached?	If YES, Volume Impacting the Watercourse: N/A		
If a Watercourse was Impacted, Describe Fully.* N/A			
Describe Cause of Problem and Remedial Action Taken.*			
Fluid escaped out of open tubing during work on wellhead by pulling unit. Safety valve was closed.			
Describe Area Affected and Cleanup Action Taken.* The leak misted 9,820 square feet of caliche pad.			
The impacted soil was excavated in two areas and confirmation soil samples were collected from the sidewalls and bottom of the excavations on May 2-4,			
2018 and May 31, 2018. Laboratory analytical results from 15 confirmation soil samples indicate concentrations of BTEX, TPH, and chloride do not			
exceed NMOCD remediation action levels. Soil impacted by chloride at a concentration of 821 mg/kg was left in place within 10 feet of the wellhead to avoid compromising the wellbore integrity. Based on the confirmation sampling results, the volume of soil removed, and the site ranking of zero, XTO			
requests no further action for this release. Vertical and lateral migration of the residual chloride concentrations is unlikely to migrate to potential receptors			
when the excavations are backfilled with caliche. Once this request is granted, XTO will back fill and recontour the well pad.			
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and			
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger			
public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health			
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other			
federal, state, or local laws and/or regulations.
