Subject: FW: Final C-141, Government NBFD Battery East Oil Tank

Mike,

Please find attached a corrected final C-141. As your email below correctly stated, the original was incorrect and confusing. Also, I have attached pictures of the battery and liner when the leak first occurred, and the final picture is the liner intact after new gravel and dirt were placed back in.

I apologize for the extended delay in getting this corrected. This got lost in the system and we just got it corrected. A closure notification via email would be greatly appreciated.

Thanks, Cliff

All,

I am not going to be able to close this out like it is written up. 20 bbl release, one line states no fluid recovered, next line states remediation completed by recovering all fluid. Was the liner inspected for integrity? Needs to say. What happened to the 20 bbls? Needs to say – just need a little more information.

Thanks,
