Rebecca,

I went out to the location today. The containment is good. The pasture does not look as if it had been impacted by a release. There is a light crust on the ground from the PW but vegetation is not impacted. No visible chlorides.

BLM will close this event. Thank you for your patience.

Ladies,

Just to give you a status update with where OCD District II is at on responses... We are just now looking at work plans that were sent in back in December 2017 and haven't been able to get to look at any closures since ones sent in around late October 2017. Sorry for the delay but we are doing our very best. Hopefully we will get to stuff like this sometime in the near future.

If at any time this seems like an issue you all would like to look further into please contact OCD Santa Fe and ask for either Allison Marks or Heather Riley or Ken McQueen. Unfortunately since more people are desperately needed for OCD Environmental teams in both D1 and D2 we will continue to do the best we can with what we have; with continued hope, that perhaps, some sort of change may eventually occur within our agency.

Thank you,

\*\*\*\* External email. Use caution. \*\*\*\*

Good Morning Rebecca,

Just following up on the location above. Has NMOCD approved this closure?

I have not been to this location and will try to make it out there this week.

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully

mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.
