The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. **In such an event a site does not achieve successful restoration, or future issues with contaminants are encountered, the operator will be asked to address these issues until they are fully mitigated and the location is successfully reclaimed.** In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

All,

Please find the attached report and closure request documenting remediation conducted at the Remuda Basin 32-23-30 State #1H Tank Battery. The work was conducted to address the recent spill with the RP number of 2RP-4420. XTO is requesting backfill/closure approval from the NMOCD and BLM/SLO.

Please let us know if you have any questions, you can contact myself or Kyle Littrell at XTO.

Thank you

Adrian Baker
