---

Maria,

I apologize but we do not have an updated remediation plan. We were planning to perform the excavation to the exact same depths as well as installing all liners as specified in RxSoil's Work plan but instead of washing the soil we will just dispose of it and bring in clean backfill.

Diamondback then would complete a closure report of their own with all remediation activities explained, along with all required closure bottom hole and side wall sampling.

Hello Zack,

Thank you for the update! Please send the updated Remediation Plan and the C-141 cover sheet. Do you have links to the new rule and updated C-141?

Best Regards,

*Maria Pruett*

Mike and Maria,

I submitted a work plan/delineation from Rx Soil for this release about 10 days ago. I explained that we may very well go with dig and haul if cost effective, and that's what we are going to do. Diamondback will be performing the remediation and also the closure report when complete. The insurance company is pressuring us to start the work on this remediation asap.
