

State of New Mexico
Oil Conservation Division

Incident ID	nAB1724135283
District RP	2RP - 4364
Facility ID	Dorset SW
Application ID	pAB1724135202

Remediation Plan

Remediation Plan Checklist: *Each of the following items must be included in the plan.*

- ☒ Detailed description of proposed remediation technique
- ☒ Scaled sitemap with GPS coordinates showing delineation points
- ☒ Estimated volume of material to be remediated 30,000 yd³
- ☒ Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- ☒ Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)
sheer volume of material to be removed will take at least 180 days

Deferral Requests Only: *Each of the following items must be confirmed as part of any request for deferral of remediation.*

- ☐ Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- ☐ Extents of contamination must be fully delineated.
- ☐ Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

OCD Only

Received by: Maria Pruett Date: 09/06/18

☐ Approved ☒ Approved with Attached Conditions of Approval ☐ Denied ☐ Deferral Approved

Signature: [Signature] Date: 09/25/18

Conditions of Approval:

- OCD has determined that DTW is less than 50', in addition the area is in a BLM mapped High Karst area. Accordingly, the Table 1 criteria are: Chlorides: 600mg/kg, TPH: 100 mg/kg, BTEX: 50 mg/kg, and Benzene: 10 mg/kg.
- The impacted zones are to be remediated to the above standards, 4' excavation plus liner will not be accepted.
- If the release comes into contact with the old pit area, the pit must also be remediated.
- Because this remediation plan was submitted after the Revised Spill Rull came into effect, all subsequent actions are to follow: 19.15.29 NMAC. This includes but is not limited to:
 - OCD 2 day notification of final sampling.
 - Full delineation of spill due to unknown amount spilled and not recovered and produced water containing chlorides above 10,000 mg/kg.
 - Restoration, Reclamation and Revegetation is required per: 19.15.29.13 NMAC.
- 90 day extension is approved.
