**NATURE OF RELEASE**

Type of Release: Produced water	Volume of Release: 1,711 bbls (1300 was in lined containment)	Volume Recovered: 1,560 bbls
Source of Release: PW tank over flowed	Date and Hour of Occurrence: 7-14-16 @ unknown time	Date and Hour of Discovery: 7-14-16 @ 8:00 am
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher, Heather Patterson and Shelly Tucker	
By Whom? Bradley Blevins via email	Date and Hour: 7-14-16 @ 11:21 am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	
If a Watercourse was Impacted, Describe Fully.* N/A		
Describe Cause of Problem and Remedial Action Taken.* BOPCO EHS was notified on 7-14-16 of a release that occurred at the PLU 320H Battery. The produced water tank ran over filling and overflowing the containment. The battery experienced a power failure and the SCADA alarms failed to communicate the upset conditions. An initial response crew was dispatched to location to scrape the saturated surface soils.		
Describe Area Affected and Cleanup Action Taken.* A vacuum truck was called to the location and recovered a total of 1560 bbls of produced water from the lined containment and ground surface. An initial response team was dispatched to location to scrape saturated surface soils.  The impacted soil was excavated. Confirmation soil samples were collected from the release area and excavation between March 6, 2018 and June 28, 2018. Laboratory analytical results for the confirmation soil samples indicate BTEX, TPH, and chloride concentrations are compliant with NMOCD remediation action levels. A Closure Request Report is attached describing all field activities. XTO requests no further action for this release.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
