---

Please be aware of the following items prior to any remedial activities.

1. The release point **DID impact a known archaeological area.**
2. The point of release occurred on and off location. **Part of the released area is covered under a previous survey.** *Possible additional surveys may be required along with an archaeology monitor.*
3. This area is located within a **LOW cave/karst zone.**
4. This site is cleared of flood zones, active playas, and intermittent streams, etc.
5. Area is noted to be within **0-3% slope.**
6. Soils are within the **Kermit-Berino fine sands**
7. **BLM Seed Mix #HEA LPC (Sand mix)** will be required.
8. The site **IS** located in **DSL habitat, HEA LPC habitat, shinnery oak,**  
. No other T&E species noted (animal or vegetative) within this area.
9. Site is **not** located within Potash
10. Site is **not** located within a Special Area of concern:
11. Site is **not** located within a RMP ACEC:
12. Site is **not** located within Special Status Plant Species:

The archaeological site will need to be addressed prior to any further remedial activities.

Sincerely,

*Shelly J Tucker*

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. **In such an event a site does not achieve successful restoration, or future issues with contaminants are encountered, the operator will be asked to address these issues until they are fully mitigated and the location is successfully reclaimed.** In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.
