Date: Tuesday, November 20, 2018 10:48:14 AM

NMSLO accepts closure of 2RP-4814, no further action is necessary. Like concurrence is also required from NMOCD.

Subject: RE: Plains Pipeline COG SRO State Com No.029H Release Site Closure Request

Good morning,
Why were sidewall confirmation samples not taken at all sidewalls and areas of differing excavation depth? I cannot tell from the diagram.

Subject: Plains Pipeline COG SRO State Com No.029H Release Site Closure Request

Ms. Pruet and Mr. Mann,

Please find the attached "Closure Request and Remediation Summary Report" and C-141 for the Plains Pipeline, L.P., COG SRO State Com No.029H Release Site, NMOCD Ref.#2RP-4814. The release occurred on June 12, 2018, at the Plains COG SRO State Com No.029H Release Site located in Unit Letter "C" of Section 3, Township 26 South, Range 28 East of Eddy County, New Mexico. The release was attributed to failure of a 1/2-inch valve coming from the discharge relief valve resulting in a crude oil release of approximately nine (9) barrels of which approximately five (5) barrels were recovered. All released fluids were contained to the caliche pad of the facility. The Release was reported to the New Mexico Oil Conservation Division (NMOCD) and New Mexico State Land Office (NMSLO). The impacted soil was excavated and confirmation soil samples were collected and analyzed for TPH, BTEX and/or Chloride concentrations. The impacted soil was transported to an NMOCD permitted Facility and the excavated area was backfilled with locally purchased, non-impacted material. If you have any questions or require any additional information, please contact me at the numbers listed below.

Respectfully submitted,

Camille J. Bryant
Remediation Supervisor
