Attached is information for the second release that I had mentioned. I will likely be handing the remediation phase for this project, as opposed to the contractor who prepared the Workplan. Proposed Remediation Workplan is within Appendix D of the Soil Assessment Report. Thanks.

Respectfully,

Joel Lowry

NMSLO approves of proposed remediation plan and additional delineation. As stated in the report, bottom and sidewall confirmation samples are necessary. Be advised that deferral will not be issued unless there is infrastructure preventing the remediation, which I don't think is the case here. Additionally, the shallow depth to gw make this unlikely. Lastly, the site will require revegetation. Please include a revegetation and noxious weed management plan in subsequent submissions. Also photo of the remediated area are greatly appreciated.

Thanks

Subject: 2RP-4657 Avalon Compressor Station Assessment Report and Remediation Plan ~RPT-11135250-15~

Maria and Ryan,

On behalf of ETC Texas Pipeline, Ltd., GHD submits the attached Assessment Report for 2RP-4657 Avalon Compressor Station release.

A Remediation Plan is included as Appendix D. We are ready to proceed with remediation (excavation).

Please let me know of any questions or comments.

Thank you,

Christine Mathews
