OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Hey Joel,

Talked to Mike about this one and it looks like we just need the final C-141 for this incident (Page 3-6), Site Assessment/Remediation Plan/Closure. It looks like everything is in order to close it, we just need the signed documents to image, so we can put them on the website and finalize closure. If you already have a copy of the signed documents you can just send those.

Thank you,

Mr. Hamlet,

My client asked that I do a little research to determine if this Site had ever been closed. From what I understand the NMSLO has closed the Site but it wasn't clear if it had been closed with the NMOCD. I checked online and didn't see any indications. Might you take a look when you get the chance. It isn't too urgent. Thanks.

Respectfully,
