RE: Chisholm Energy Operating \*Dark Canyon Water Line (2RP-5098) CLOSURE REPORT

Ms. Bradshaw,  
OCD has received your closure request and final C-141 for Dark Canyon Water Line (**2RP-5098**), thank you. This closure is approved.  
Please, let me know if you have any questions.  
Regards,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Ms Venegas,  
I apologize for the discrepancies on the Fig. 3 map, my legend did not update correctly. I have attached the updated map including the pipeline locations and placed the point of release in the proper place (it was previously linked to the well location instead of the exact release location). The point of release is located very near sample site L4 which was the closest area that could be reach for sampling due to the position of the pipelines. No liner was used at this location. Please let me know if you have any further questions or comments. Thank you.

Ms. Bradshaw,

In Fig. 3 Site and Sample Location, the release area is not depicted in the figure, although it is included in the Legend. Also, Figure 3 does not show the location of the liner or the pipes. Could you please clarify this point?

There are no sample points between the point of release and the place where the samples were taken. Was that area delineated?

Thank you and have a nice weekend.
