RE: COG Screech Owl Fed #4H (2RP-4944) 8.18.18 Closure Request

Ms. Gonzales,

OCD has received your closure request for COG Screech Owl Fed #4H (**2RP-4944**) 8.18.18, thank you. Unfortunately, at this time, this closure request is not approved for the following reason:

- The release is located in a high karst area. OCD considers high karst area as "an unstable area". Please note that according to OCD rule, *if a release occurs within an unstable area, the responsible party must treat the release as if it occurs less than 50 feet to groundwater in Table I of 19.15.29.12 NMAC.*
- Analytical data for two sample points, North Sidewall# 5 and North Sidewall# 6, show chloride concentration values above the limit of 600 mg/kg. Based on these results, OCD considers that the contaminated soil at these two points is still in place and this closure cannot be approved.

Please let me know if you have any further questions.

Regards,

Victoria Venegas
EMNRD
OCD-District II
811 S First St. Artesia
NM 88210
Victoria.Venegas@state.nm.us

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
