#### Cause of Release

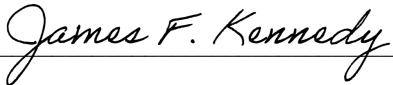

8" poly SWD line carrying produced water from the Golden Graham 1 St Com #701H and #721H Facility to Shocker SWD #1 and a 3<sup>rd</sup> Party SWD owned by Solaris. The subject line is bored under the Pecos River, and is encased in a 10" steel casing pipe. During operations, the Solaris SWD was shut in for an unknown reason, causing the line to over pressure, resulting in a parting of the 8" poly SWD line. The release filled the casing and released through the vent pipes located on each side of the river. The release migrated toward the river on the east and west side. Initial assessment of the impacted area does not indicate impact to the waters of the Pecos River.

### Initial Response

*The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury*

<input checked="" type="checkbox"/> The source of the release has been stopped. <input checked="" type="checkbox"/> The impacted area has been secured to protect human health and the environment. <input checked="" type="checkbox"/> Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices. <input checked="" type="checkbox"/> All free liquids and recoverable materials have been removed and managed appropriately.	
If all the actions described above have <u>not</u> been undertaken, explain why:	
Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
