Subject: RE: Remediation Work Plan - Elk Wallow 11 State #001H Battery/2RP-4967

Maria,

We have reviewed the remediation work plan for the Elk Wallow 11 State #1 release (attached, originally submitted 11/8/18 below). The work plan for this site was not requesting a time or sampling "variance." It proposes an alternative remediation method to excavation. Since it is not a standard remediation approach, there is additional information regarding background, existing sampling data, and method. We believe including that additional detail is appropriate in this case. We have consulted with Shelly Tucker at BLM and believe this approach best fits with BLM's preference and will accomplish remediation to NMOCD standards.

Thank you
