RE: **2RP-5133**

Dakota,

OCD will approve your proposed sampling plan. Be aware that this site is in High Karst, so subject to the more stringent closure levels in Table 1. I didn't look at depth to groundwater, but it is also in close proximity, and uphill from the Pecos.

Let me know if you have questions and apologize for not getting back with you sooner.

Thanks,

Mike Bratcher
NMOCD District 2
811 South First Street
Artesia, NM 88210
575-748-1283 Ext 108

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to ground water, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, local laws and/or regulations.

Subject: [EXT] (Urgent Alternate Confirmation Sampling Plan) Windmill 32 Federal Com #004H (30-015-41286) 12-07-2018

Mr. Bratcher,

COG would like to propose an alternate sampling plan for confirmation samples at the Windmill 32 Federal Com #004H. We propose that samples be taken every 1,000 square feet instead of every 200 square feet. Attached is a site diagram depicting where samples will be taken.

Please let me know if you have any questions.

Subject: (48 Hour Sampling Notice) Windmill 32 Federal Com #004H (30-015-41286) 12-07-2018

Mr. Bratcher,

COG is giving notice that confirmation soil sampling is scheduled to take place within approximately two (2) business days at the above referenced location. If you have any questions or concerns please let me know.

Mr. Bratcher/Ms. Tucker,

Please find the attached C-141 for your consideration. Also, attached is the calculation sheet to determine the estimated release volume. The liquid lost estimate is based on the spill dimensions, estimated depth of fluid (wet soil depth) and type of formation. The spreadsheet will calculate the volume lost in the ground and does not include the recovered amount in the calculation. The calculated volume in the ground and the volume recovered were added together and reported on the C-141. If you have any questions or concerns please do not hesitate to contact me.

Thank you,

DeAnn Grant
