II. Background

Safety and Environmental Solutions, Inc., hereinafter referred to as (SESI) was engaged by

Ascent Energy, to assess a spill area on the Emperor Oil Co Federal Gas B Com #001. According to the C-141: the cause of release, was due to shallow hole in the tuning the caused a leak in the packing on the stuffing box. A Trimble Juno 3B handheld was used to map the spill area. There was overspray to the pasture area on the North side of the location. (Figure 2). Approximately 9,849 square yards of surface area was impacted.

III. Surface and Ground Water

There is no record of groundwater in the immediate vicinity of the site location. Further research of the New Mexico Office of the State Engineer records indicates the average depth to groundwater for the area to be 132' bgs. Thereby, posing no eminent threat or danger to life forms in the area (Appendix B).

IV. Work Performed

On March 29, 2019 SESI personnel at the requirement of BLM representative, Jim Amos, visited the site for treatment of the pasture area. SESI personnel flagged five (5) areas that required treatment and began the application of Micro Blazing for treatment of the overspray on the impacted pasture area.

On April 15, 2019 SESI personnel revisited the site, assessing the spill and over sprayed area in order to determine sample point positions for adequate horizontal and vertical delineation. Fifteen (15) Auger Hole positions were assigned, mapped, and advanced to depths of 1 ft. bgs. Soil samples were grabbed at surface, at one-foot increments, field tested, and packaged for laboratory confirmation. All samples were properly packaged, labeled, preserved, and transported to Hall Laboratories via Chain of Custody for analyses. The following constituencies were analyzed:

Chloride (CI Method 300.0 Anions), Total Petroleum Hydrocarbons (TPH Method 8015), and Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX Method 8021B). The table below is a recap and tabulation of the results from the Hall Laboratory analyses for ease of reference (Appendix C):

V. Conclusion

On June 05, 2019 the work plan as it was filed with NMOCD was approved.

On August 09, 2019 SESI personnel, together with equipment and personnel from Custom welding of Hobbs, NM were on site to excavate and remove the impacted soil from the pad and pasture areas respectively. Approximately 400 (four hundred) yards of impacted soil were transported to Lea Landfill (an NMOCD approved facility). Pursuant to DCP Midstream response to New Mexico One Call Clearance; remedial activities were restricted to remain outside there marked lines by a 50 ft. (Figure 2) clearance. SESI personnel field tested and grabbed soil samples from the sidewalls and bottom of excavated areas. The excavated areas, as well as soil sample positions were mapped. All confirmation soil samples were properly packaged, preserved, and transported to Cardinal Laboratories of Hobbs, NM (an NMOCD approved facility) via Chain of Custody, and analyzed for Chlorides (CLSM45000CI-B), Benzene, Toluene, Ethylbenzene, Total

Xylenes (BTEX Method 8021B), Total Petroleum Hydrocarbons (TPH Method 8015M). Please see table below for tabulated results:

Sample ID	BTEX EPA Method 8021	Chloride EPA Method 300 Anions	DRO EPA Method 8015	GRO EPA Method 8015	EXT DRO EPA Method 8015
SP-1 Bottom 1'	<0.300	<16.0	<10.0	<10.0	<10.0
SP-2 Bottom 1'	<0.300	<16.0	18.3	<10.0	<10.0

SP-9 Bottom 1'	<0.300	352	<46.9	<10.0	13.7
SP-10 Bottom 1'	<0.300	352	51.1	<10.0	19.6
SP-11 North Wall	<0.300	336	49.1	<10.0	18.3
SP-12 East Wall	<0.300	64.0	<10.0	<10.0	<10.0
SP-13 West Wall	<0.300	48.0	<10.0	<10.0	<10.0
SP-14 South Wall	<0.300	48.0	<10.0	<10.0	<10.0

Based on the recapped soil analyses; the excavated areas were backfilled with clean native topsoil, and fresh base course caliche (a like material for the pad area). The pasture area was restored to dunal features and reseeded with a BLM #2 approved seed mix. The pad area was returned to grade.

Remedial actions at this site have all been performed with the approval of, and in accordance with all NMOCD and BLM requirements respectively.

As a result, we respectfully submit this closure report for your consideration and approval.

RE: BC GAS

Enclosed are the results of analyses for samples received by the laboratory on 08/12/19 16:50.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-18-11. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (*). For a complete list of accredited analytes and matrices visit the TCEQ website at www.tceq.texas.gov/field/qa/lab_accred_certif.html.

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Celey D. Keene

Lab Director/Quality Manager

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.

Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

Closure Report Attachment Checklist: Each of the following items must be included in the closure report.

- X A scaled site and sampling diagram as described in 19.15.29.11 NMAC
- X Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)
- X Laboratory analyses of final sampling (Note: appropriate ODC District office must be notified 2 days prior to final sampling)
- X Description of remediation activities

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.
