Subject: RE: Remediation Conditional Approval - ConocoPhillips - James A-1 Battery - (2RP-4558) 1-4-2018

Over the limit of 100 mg/kg for TPH. Just noticed!

Thanks

Subject: Remediation Conditional Approval - ConocoPhillips - James A-1 Battery - (2RP-4558) 1-4-2018

Gustavo,

We have received your Workplan/Remediation Proposal for **2RP-4558 James A-1 Battery**, thank you. This Workplan/Remediation proposal is conditionally approved.

The bottom sample point at Sample ID: AH-10 (2-3 ft) is over the limit of 100 mg/kg and needs to be excavated down further (4 ft most likely), since it is in the pasture. If the bottom sample is still over the limit, it has not been vertically delineated. Please make sure your closure sample is under the limit for this sample location before your closure report is submitted.

Please let me know if you have any further questions.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
