Rebecca,

I've noticed in a lot of your reports that you have the sentence, "The pasture area with petroleum hydrocarbon staining will be remediated to soil screening levels for chlorides of <600 mg/kg, and <2,500 mg/kg for Petroleum Hydrocarbons". Please replace the <2,500 mg/kg for Petroleum Hydrocarbons with <100 mg/kg for TPH. Other than, everything else checks out. Just wanted to make sure we we're on the same page on the pasture portion of the spill.

Thank you,

Robert J Hamlet
