Attachments: Remediation Conditional Approval - Solaris - Stella Blue Flowback Line - (2RP-5324) 10.18.19.pdf

Rob,

We have received your Workplan/Remediation Proposal for **2RP-5324 Stella Blue Flowback Line**, thank you. This Workplan/Remediation proposal is conditionally approved.

The Workplan/Remediation Proposal is approved under the following conditions:

1. All off pad areas to contain a minimum of 4 feet non-waste containing uncontaminated, earthen material with chloride concentrations less than 600 mg/kg and TPH less than 100 mg/kg
2. If rock refusal interferes with the remediation process, use a back-hoe/track-hoe to remove the rock. If the rock is immovable and target depth cannot be reached, use a hydrovac to clean the contaminated soil off of the rock surface and outline specific locations and steps taken on the Closure Report.
3. All other closure reporting need to follow requirements set forth in 19.15.29.12 NMAC
4. Restoration, reclamation and re-vegetation to 19.15.29.13 NMAC

This is a Federal site and will require like approval from BLM.

Please let me know if you have any further questions.

Regards,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
