RE: [EXTERNAL] Release notification- Pickett Draw federal 1 (API: 30-015-25767)

All,
The OCD tracking number for this release event is **2RP-5537**.
Thank you,

Victoria Venegas
EMNRD
OCD-District II
811 S First St. Artesia
NM 88210
Victoria.Venegas@state.nm.us

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] RE: [EXTERNAL] Release notification- Pickett Draw federal 1 (API: 30-015-25767)

Good Morning Jim,

The information you requested is below-

- On June 21, 2019, during hydraulic fracturing operations in the 2nd Bone Springs formation at the Corral Canyon Federal Com 006H well in Eddy County, New Mexico, underground pressure communication was established with the Pickett Draw Federal #1 well.
- Pressure communication led to flowline failure on Pickett Draw Federal #1 resulting in a release of produced fluid consisting of primarily water.
- Impacts of produced fluid occurred on location and to the pasture to the northwest (approximately 61 feet from pad, 32.150347, -103.991909) and to the northeast (overspray approximately 180 feet from pad, 32.150617, -103.991295).
- The event was addressed quickly, and
- Currently, there is no ongoing unconstrained flow.

As always, if you have any additional needs or questions, please feel free to contact me directly. Thanks. –Kyle
