Mr. Hamlet,

Due to the recent rains and access issues in the area of AH-6, the area was resampled on August 5, 2019 and showed a chloride concentration of 48 mg/kg.

Thank you,

Clair Gonzales,

Clair,

On page 3 of the report, it says "AH-6 at 0-1' below surface showed a chloride below 600 mg/kg of 48.0 mg/kg. Table 1 has soil sample location AH-6 (0-1') at 3,730 mg/kg for chlorides. Can you tell me which one is correct?

Thank you,

Robert J Hamlet
