Hi Victoria,

Hope all is well. I don't have your number otherwise I would have called as it might have been easier to explain over the phone. I was forwarded this email from Ashley Maxwell with SM&A. Heather is no longer working for SM&A and Ashley Maxwell has taken over as project manager. Callie (also no longer working for Marathon) seems to have submitted the coordinates to the actual well head of the Black Horse 7 Fed Com 1H. The flare and tanks are located on the Green Frog Café Fed Com 1H well pad. I can see where the confusion is as the report references the Green Frog Café Fed Com 1H well pad that's closer to Laguna Gatuna. I can change the C-141 forms to show the correct coordinates if that's ok with you? If so, would I just need to email the corrected Closure Report to you or re-submit on the OCD website? I'm sorry for any confusion this might have caused.

Thank you,

Isaac Castro

Sorry guys, I just noticed this one didn't go to you or even Marathon. You might want to reply that I don't work at SMA anymore.

Black Horse 7 Fed Com 1H Fire (1RP-5511), Lea

Hi Heather,

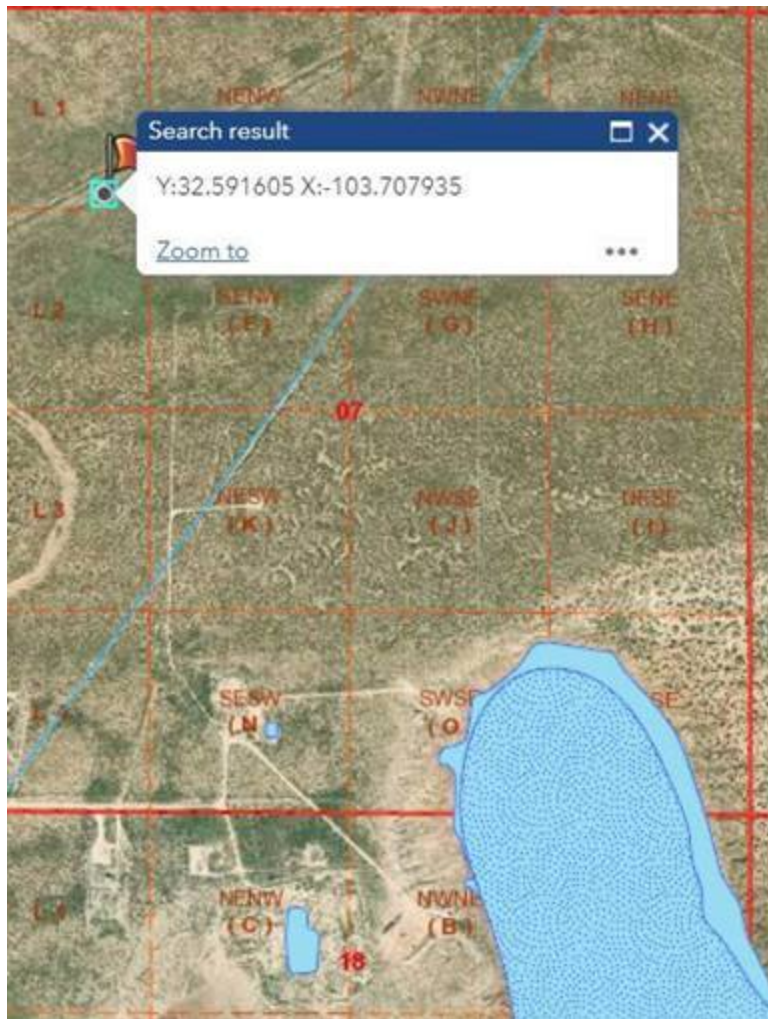

A question regarding the Closure Report for: Black Horse 7 Fed Com 1H Fire (**1RP-5511**) Lea:

- In Figure 1 and Figure 2, the point of release is located approximately 500 feet West of Laguna Gatuna.

Surface Water Protection Map
Black Horse 7 Fed Com 1H - Monahan Oil
Sec. 7 T20S R31E, Lea County, New Mexico

- The lat/long coordinates provided in form C-141 are: 32.59160463, -103.70793500. As you can see in the figure below (NMOCD Environmental Map), this location does not correspond with the point of release depicted in the closure report. Can you please clarify the actual location, the Lat/Long coordinates, of the release source?

Thanks,

Victoria Venegas
