Attachments: 2RP-4558 JAMES A-1 BATTERY Remediation Sampling Plan rev3.pdf

Thank you for the response Rob.

After speaking with Mike, I am submitting this revised sampling plan.

In accordance with 19.15.29.12(D)(1)(b) NMAC, and on behalf of ConocoPhillips, Tetra Tech submits this *revised* alternative confirmation sample plan for the division's review and approval.

The attached figure provides proposed discrete sidewall and confirmation sampling locations of the remediated area where each discrete sample (sidewall and floor) is representative of approximately 500 square feet of excavated area. Thank you for your time.

Christian

Christian,

At this time, requests for Characterization, Remediation, and Closures on releases that occurred prior to August 14, 2018 will need to be submitted to Bradford Billings in the Santa Fe office.

bradford.billings@state.nm.us

Additionally, this will need to be uploaded to the Payment Portal for document review.

Thank you,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: [EXT] RE: Remediation Conditional Approval - ConocoPhillips - James A-1 Battery - (2RP-4558) 1-4-2018

Mr. Hamlet,

In accordance with 19.15.29.12(D)(1)(b) NMAC, and on behalf of ConocoPhillips, Tetra Tech submits this alternative confirmation sample plan for the division's review and approval.

The attached figure provides proposed discrete sidewall and confirmation sampling locations. The confirmation samples will be analyzed for the constituents listed in Table I of [19.15.29.12](#) NMAC

Per below, this Workplan/Remediation proposal is conditionally approved for **2RP-4558 James A-1 Battery**. The attached figure indicates the additional excavation noted in the conditional approval.

We plan to begin excavation at the release area on November 19, 2019.

Please let me know if you have any further questions.

Christian

Over the limit of 100 mg/kg for TPH. Just noticed!

Thanks

Subject: Remediation Conditional Approval - ConocoPhillips - James A-1 Battery - (2RP-4558) 1-4-2018

Gustavo,

We have received your Workplan/Remediation Proposal for **2RP-4558 James A-1 Battery**, thank you. This Workplan/Remediation proposal is conditionally approved.

The bottom sample point at Sample ID: AH-10 (2-3 ft) is over the limit of 100 mg/kg and needs to be excavated down further (4 ft most likely), since it is in the pasture. If the bottom sample is still over the limit, it has not been vertically delineated. Please make sure your closure sample is under the limit for this sample location before your closure report is submitted.

Please let me know if you have any further questions.

Thank you,
