Subject: [EXT] Extension Request- Mis Amigo Battery (1RP-5607)

All,

XTO is requesting an extension of the current 90 day deadline for submitting a remediation work plan or closure report required in 19.15.29.12.B.(1) NMAC Mis Amigo Battery (1RP-5607). The release was discovered on June 18, 2019. Operations prevented XTO from initiating site assessment and remediation work. Initial site assessment was started August 22, 2019. Remediation work began September 4, 2019 and was completed this week. To provide enough time to fully analyze laboratory results and prepare a remediation work plan or closure report XTO requests a 30-day extension of the current deadline to October 16, 2019.

Thank you,

Kalei Jennings
