Susan,
Construction of the east containment, west containment, raw produced water AST, and future treated water AST are all complete. The location of the east containment is Lat: 32.015111 Long: -103.716825 WGS84. The location of the west containment is Lat: 32.015117 Long: -103.717736 WGS84.

I don't have the exact locations of the raw produced water AST and future treated water AST. I do have the Lat: 32 00 45.37 WGS84 and Long: 103 42 50.80 WGS84 for the Superman Recycling Facility pad. Will the pad coordinates for the Superman Recycling Facility work? If not, I will have to get a surveyor out to get Lat and Longs on each AST.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good morning, Jeremy.

Thank you for the notification of the completed construction of the ConocoPhillips Zia Hills/Superman Recycling Facility and Containment 1RF-454.

Please confirm which containment(s) construction was completed. Per the approved application, the Zia Hills/Superman Recycling Facility and Containment included one (1) facility and four (4) contaminants (east containment, west containment, raw produced water AST, and future treated water AST).

The permit included a generalized location for all four (4) containments. Per the permit conditions, ConocoPhillips shall provide the specific location of each containment.

Please do not hesitate to contact me if you have further questions.

Regards,

Susan

Subject: [EXT] Construction Notification - 1RF-454

To Whom It May Concern,

ConocoPhillips respectfully provides notice of the construction start dates for the Superman Recycling Facility and Containment (1RF-454). Construction of the containment began on 2/24/20. Construction of the recycling facility began on 9/28/20. Construction of both the Superman Recycling Facility and Containment are now complete.
