Subject: [EXT] RE: 2RF-154 - Longfellow Energy Impound 24 Recycling Containment

Importance: High

Thank you Ms. Venegas,

I appreciate your assistance and prompt reply. I've spoken with Longfellow Energy and confirmed that they intend to fill the pond with fresh water to capacity with the required 3' of freeboard. Based on a field survey, the storage volume is approximately 982,352 BBL.

Please consider this email as formal notice for the 2RF-154 Admin Order mentioned in your message below and let me know if there are any further questions.

Thanks again!

Good morning Mr. Roybal,

There shouldn't be any problem with putting fresh water in it. Please send an email with your request for the 2RF-154 Admin Order file and give an estimated volume.

I will ask Eva Mathes about the current status of the bond and I will let you know. You can also contact Ms. Mathes at Eva.Mathes@state.nm.us. I have copied Ms. Mathes in this email.

Thank you,

Importance: High

Hello Victoria,

I wanted to circle back with you on this and let you know that the owner found a contractor who could install the fence per our original C-147 request. This we will not need to modify our previous request.

I did have two additional questions for this project:

- 1) Construction is nearly completed on one of the two ponds at this point in time and will be complete within a week. Can **fresh** water be stored in the completed pond as soon as the work is done? Work on the second pond will be nearly complete but not finished at that time. Do we need to submit any formal notice for this?
- 2) Also, Would you happen to know the status of the bond that was submitted for this project? I understand it was sent to Eva Mathis (I may have the name spelled incorrectly). The owner told me it was submitted a few weeks ago and they have not had a response on it.

Again I appreciate your help and assistance on this matter.

2RF-154 - Longfellow Energy Impound 24 Recycling Containment

Good morning Mr. Roybal,

Sorry I missed your call. If you are going to use another type of fence material, you have two options:

- To use "a four-foot fence that has at least our strands of barbed wire evenly spaced in the interval between one foot and four feet above ground level" 19.15.34.12D. (2) please submit form C-147 with the "Modification" box checked and a cover letter explaining the reason for the requested modification (this is not a variance).
- For the use of a fence different than that described in 19.15.34.12D.(2), that's a variance of the rule. Please submit form C-147 with the "Modification" box checked and a cover letter that includes:
 - ❖ a statement explaining the need for the variances,

- ❖ a written demonstration that the variance will provide equal or better protection of freshwater, public health and the environment
- ❖ If possible, a drawing or a schematic of the proposed fence.

Please submit the modification through [OCD.online](#) as soon as possible.

Thank you,
