Subject: [EXT] Closure Report - Big Eddy Unit DI4B #274H (2RP-5595)
Attachments: XTO_Closure Request_Big Eddy Unit DI4B #274H_2RP-5595.pdf

On behalf of XTO, please see the attached closure report for the Big Eddy Unit DI4B #274H (2RP-5595). The report has been uploaded to the NMOCD permitting portal (PO#: A23NR-191125-C-1410).

BLM Summary:

Delineation soil samples BH01/BH01A through BH03/BH03A were collected from within the release extent from depths of 0.5 foot and 1.5 feet bgs to assess for the presence or absence of soil impacts as a result of a release of 5 bbls of treated freshwater. Laboratory analytical results for all soil samples indicated benzene, BTEX, GRO and DRO, TPH, and chloride concentrations were compliant with the Closure Criteria. Additionally, field screening of soil indicated volatile aromatic hydrocarbons and chloride concentrations were not elevated and soil staining and petroleum hydrocarbon odors were not identified within the release extent. XTO requests no further action.
