NRM2009845600 EMPIRE ABO UNIT K-14 @ K-02-18S-27E 0N 0E

Mr. Baker,

The OCD has approved the Site Characterization and Remediation Plan for incident # NRM2009845600 EMPIRE ABO UNIT K-14 @ K-02-18S-27E 0N 0E, with the following conditions of approval:

- This release occurred in High Karst area which is considered an unstable area and requires the entire spill to be remediated to the most stringent cleanup levels on Table 1 of the Spill Rule <http://164.64.110.134/parts/title19/19.015.0029.html>.
- Sidewall samples and bottom samples must meet the closure criteria for this site. Soils which have been treated, remediated, or landfarmed are acceptable for closure. After treatment, soils must contain concentrations of chloride of less than 600 mg/kg, a TPH concentration of no more than 100 mg/kg, a total BTEX concentration of no more than 50 mg/kg, and a benzene concentration of no more than 10 mg/kg. Lab data must be provided.

The signed C-141 can be found in the online image data base under the incident #.

NOTE: For your next submittals, please provide a better quality copy of the report. Figure 2 Site Map, is barely legible and extremely dark.

Thank you,

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
